QUIZ 2 LAB PW

CODENYA:

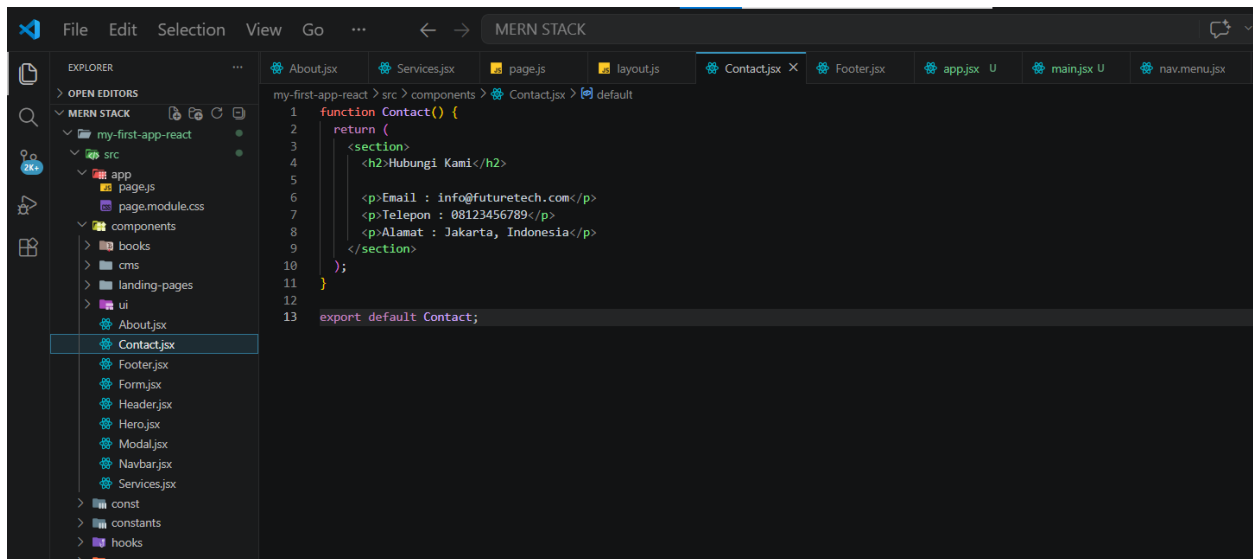

About.jsx

The screenshot shows the Visual Studio Code editor with a project named 'my-first-app-react'. The Explorer panel on the left shows the file structure, with 'About.jsx' selected under the 'components' folder. The main editor displays the code for 'About.jsx'.

```
1 function About() {  
2   return (  
3     <section>  
4       <h2>Tentang Kami</h2>  
5  
6       <p>  
7         FutureTech adalah perusahaan yang bergerak  
8         di bidang pengembangan website, aplikasi,  
9         dan transformasi digital.  
10      </p>  
11    </section>  
12  );  
13 }  
14  
15 export default About;
```

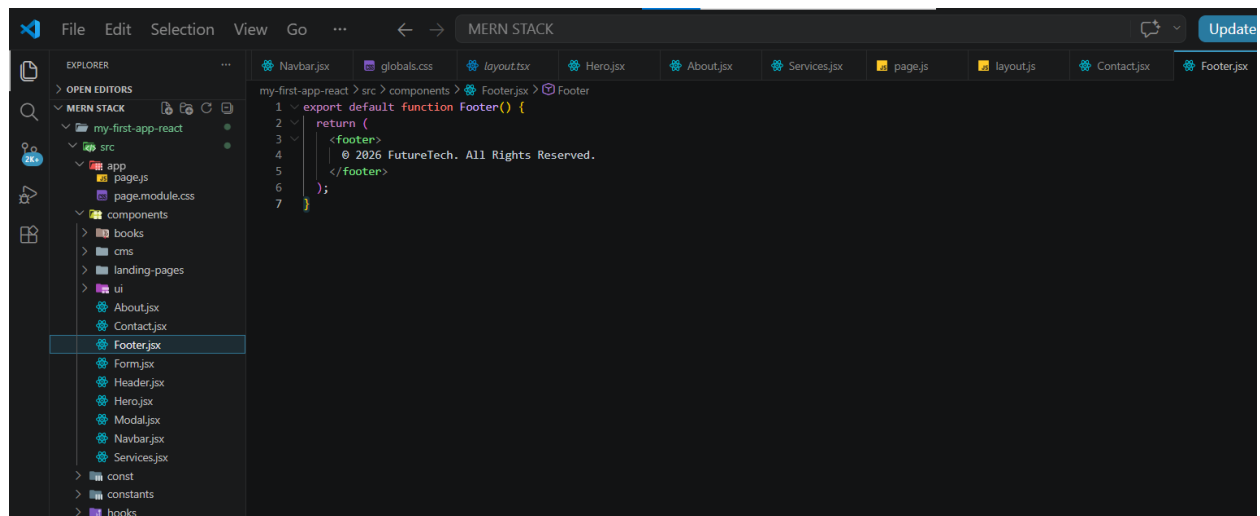

Contact.jsx

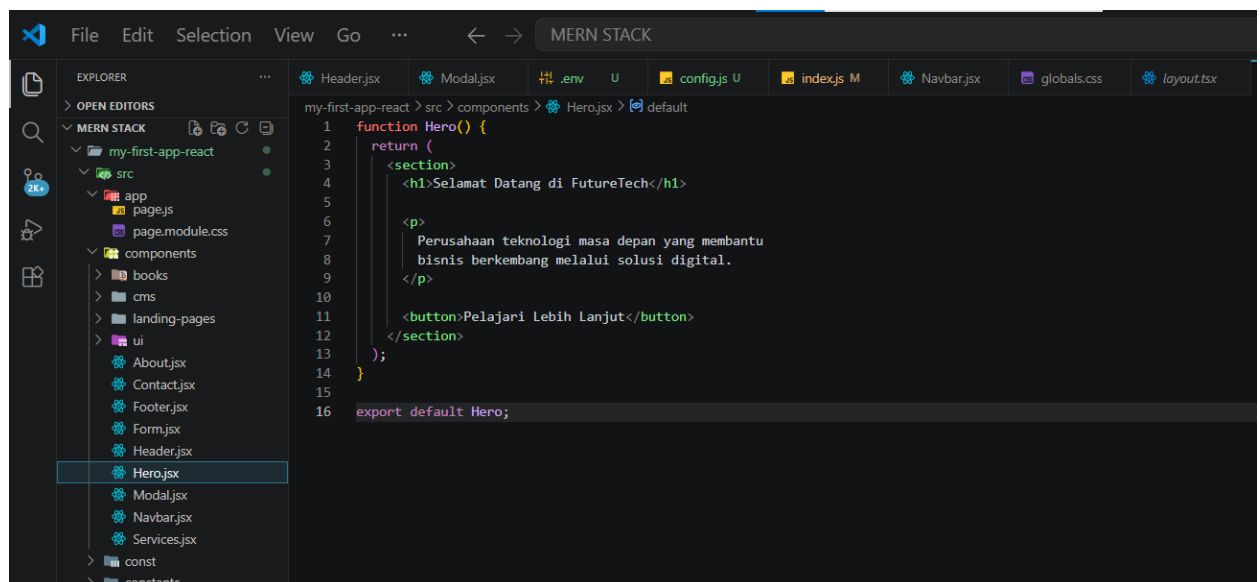

The screenshot shows the Visual Studio Code editor with the same project. The Explorer panel shows 'Contact.jsx' selected under the 'components' folder. The main editor displays the code for 'Contact.jsx'.

```
1 function Contact() {  
2   return (  
3     <section>  
4       <h2>Hubungi Kami</h2>  
5  
6       <p>Email : info@futuretech.com</p>  
7       <p>Telepon : 08123456789</p>  
8       <p>Alamat : Jakarta, Indonesia</p>  
9     </section>  
10  );  
11 }  
12  
13 export default Contact;
```

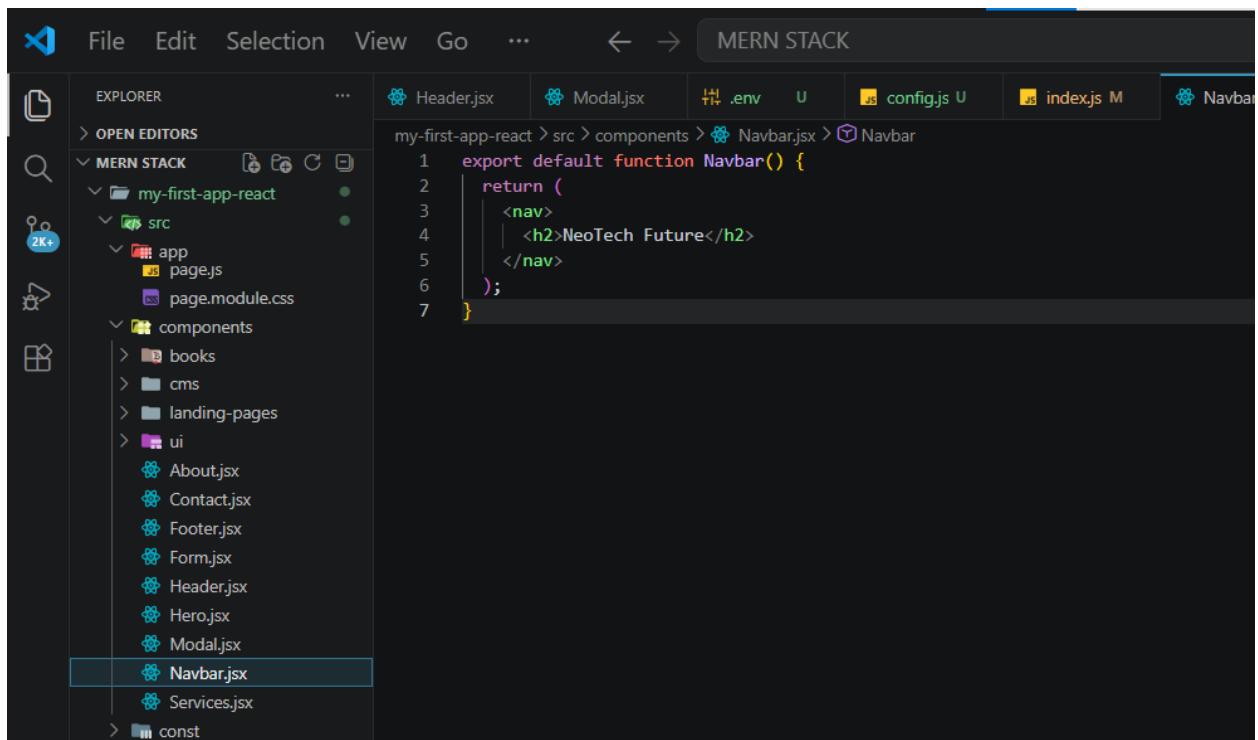

Footer.jsx

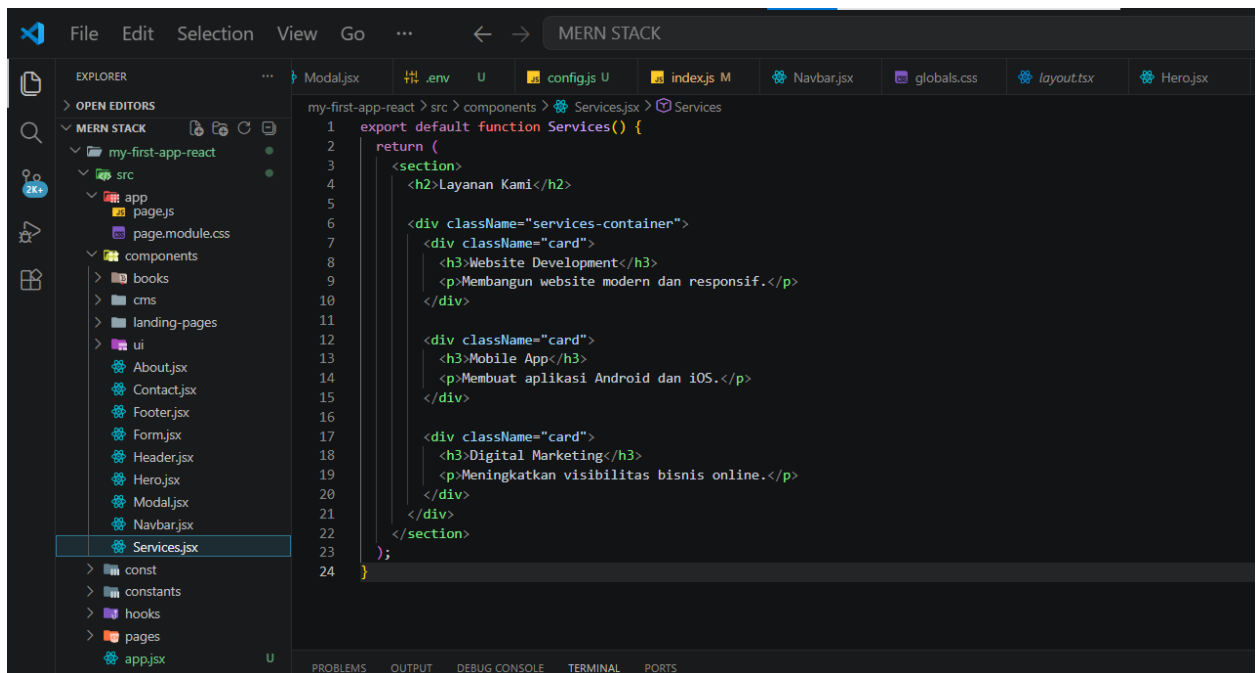

Hero.jsx

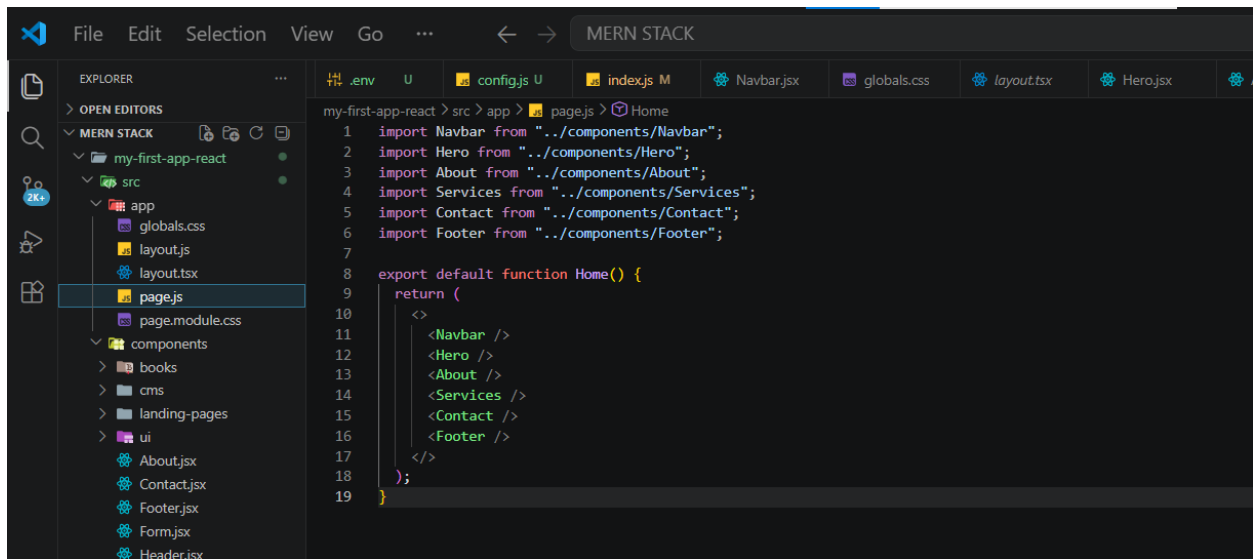

Navbar.jsx

Services.jsx

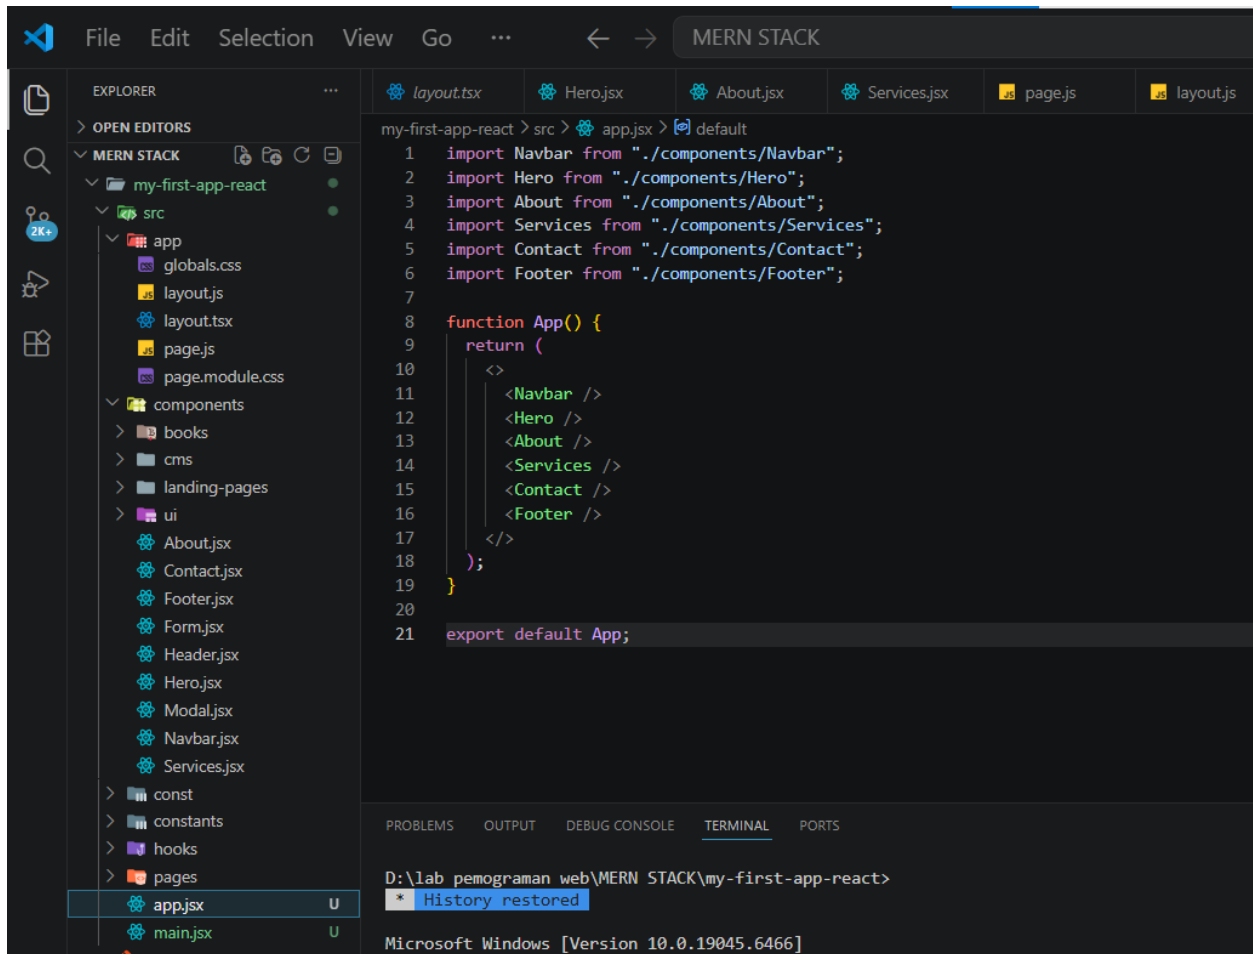

Page.js

The screenshot shows the Visual Studio Code editor with a project named "MERN STACK". The Explorer sidebar on the left shows the file structure: "my-first-app-react" > "src" > "app" > "page.js". The main editor displays the code for "page.js", which imports components from the "components" directory and renders them in the "Home" function.

```
1 import Navbar from "../components/Navbar";
2 import Hero from "../components/Hero";
3 import About from "../components/About";
4 import Services from "../components/Services";
5 import Contact from "../components/Contact";
6 import Footer from "../components/Footer";
7
8 export default function Home() {
9   return (
10     <>
11       <Navbar />
12       <Hero />
13       <About />
14       <Services />
15       <Contact />
16       <Footer />
17     </>
18   );
19 }
```

App.jsx

The screenshot shows the Visual Studio Code editor with the same "MERN STACK" project. The Explorer sidebar shows the file structure, and the main editor displays the code for "app.jsx". The code imports components and renders them in the "App" function. The bottom of the editor shows the "TERMINAL" tab with the command prompt and a message indicating that the history was restored.

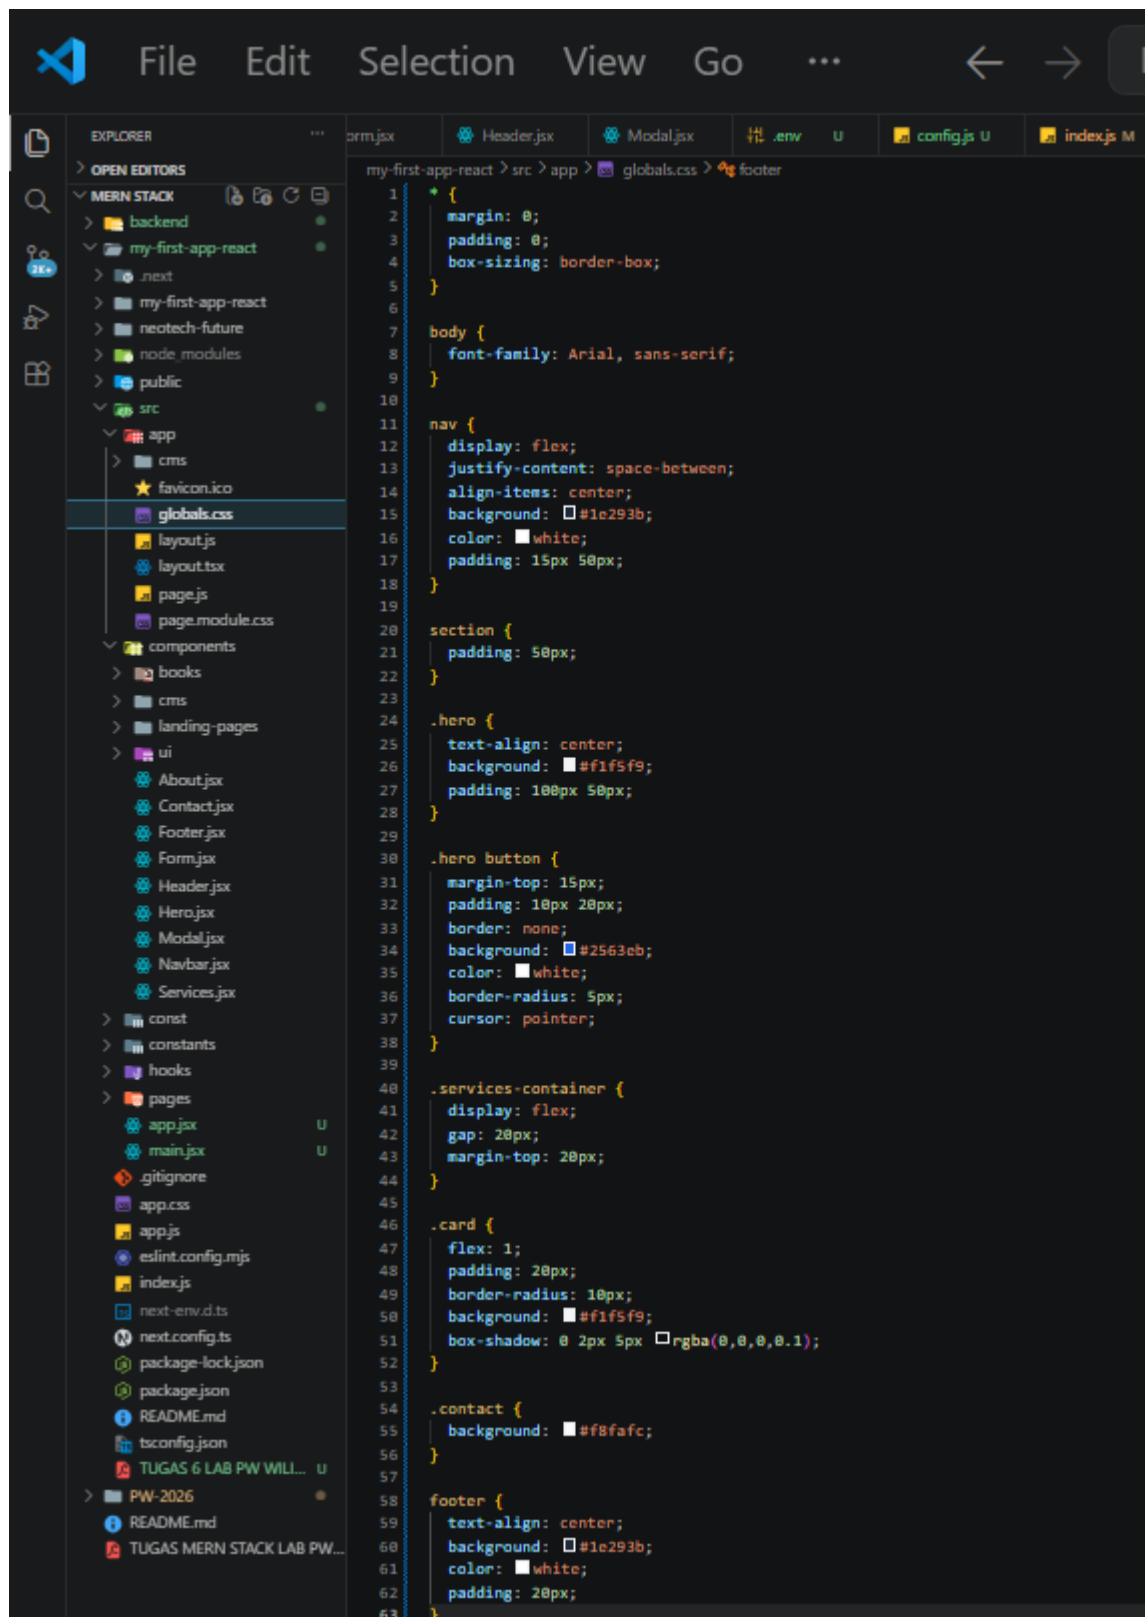

```
1 import Navbar from "../components/Navbar";
2 import Hero from "../components/Hero";
3 import About from "../components/About";
4 import Services from "../components/Services";
5 import Contact from "../components/Contact";
6 import Footer from "../components/Footer";
7
8 function App() {
9   return (
10     <>
11       <Navbar />
12       <Hero />
13       <About />
14       <Services />
15       <Contact />
16       <Footer />
17     </>
18   );
19 }
20
21 export default App;
```

PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS

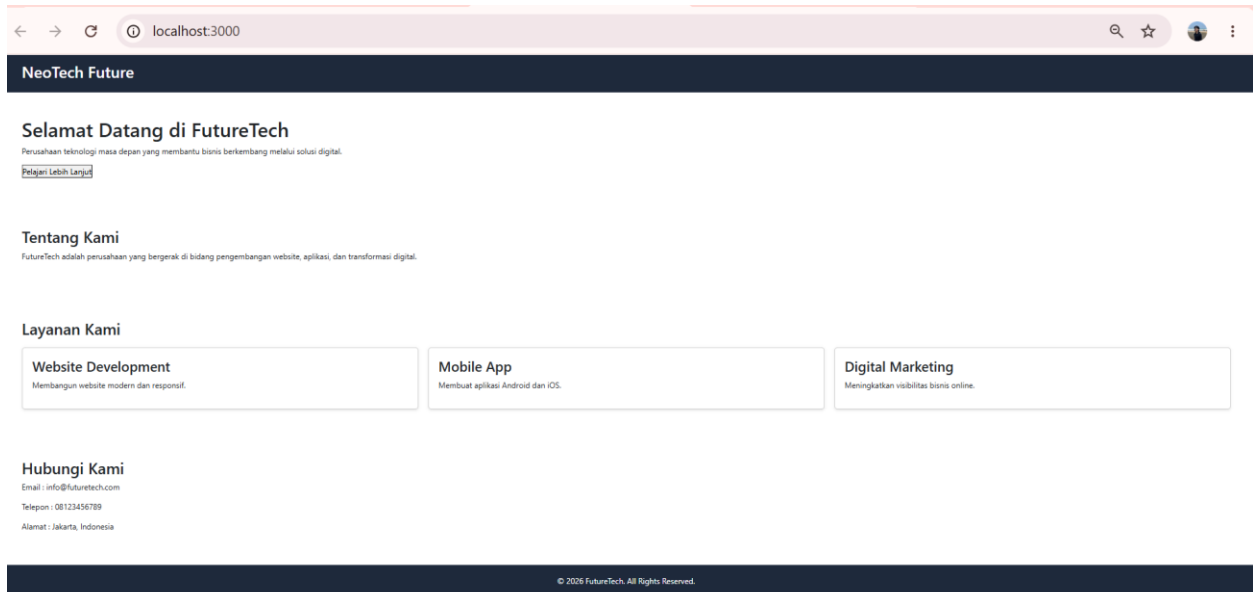

D:\lab pemograman web\MERN STACK\my-first-app-react>
